

# HEART CHASER!

by Sakis Kaffesakis 2020

Loading instructions:

If you use tape, go to tape mode by typing < ltape > (the first letter l can be typed using shift and the key just right of the letter p)

Type < run"chaser.bas" >

You can visit <https://amstradsakis.blogspot.com/p/how-to-play.html> for detailed instructions (photos/videos).

Keys used can be chosen from the menu option (Joystick, AWSD keys, QAOP keys). Do not use capital keys. If you have a non English keyboard, keep in mind that you may have problem with <w>, so you can try another option.

In this game, you have to collect the hearts, but without getting caught by the angry enemy.

You have to collect 5 hearts for each level.

There are 7 levels, but the enemy gets a bit smarter in every level!

You have only 2 lives!

**Have fun!**

Runs better in Winape emulator (Winape 2.0 beta 2)

Hope you enjoy! Many thx for your interest!
