

CAPITAL QUIZ!

by Sakis Kaffesakis 2019

Welcome to Capital Quiz!

This game is a simple game! The questions show a country, and you choose what you think is the correct answer, the city you believe that it is the capital of the mentioned country!

If you use tape, go to tape mode by typing < ltape > (the first letter l can be typed using shift and the key just right of the letter p)

Type < run"CAPITALQ.bas" >

You can choose for 1 player mode or for 2 player mode.

You also enter how many questions you want to be asked for the game (0-100 as there are 100 questions in the database). Sequence is random and no question appears for a second time in each game.

The questions refer to countries from all over the world, we tried to include many countries from all continents.

In 1 Player game, you can try to make a really high score!

In 2 Player game, try to beat your opponent!

You start with 1000 points. For each question you answer correct, you get 100 points, but if it is not correct, you lose 100 points!

Double bet means that you get 200 points in case of correct answer but you lose 200 if it is wrong! Double bet is activated every 5 questions (questions 5,10,15 etc).

Triple bet appears randomly! Each question has 10% for triple bet activation (Triple bet can appear in double bet questions). Triple bet means that you can get 300 or lose 300 points!

On either double bet or triple bet, the game delays a bit the appearance of the question, so that you are prepared for that!

If no answer is made, both players lose!

But: in 2 player mode, choice is made by player who presses first the button! The other player that didn't press has no change in his score! So, when you make a choice, try to be sure, as you will lose points if you are wrong, while your opponent has no change!

If your answer is correct, you get a time bonus (1-49) depending on how fast you answered! (you have 10 seconds to give an answer).

Score cannot be under zero! When it is zero and you lose, it remains zero!

Runs better in Winape emulator (Winape 2.0 beta 2)

Hope you enjoy! Many thx for your interest!
